BYOD Information Session

Netivot HaTorah
Day School
January 2013

Netivot HaTorah
נתיבות ה תורה
Torah. Israel. Derech Eretz.

Laptops

Laptops are convenient tools to use at school since you are able to use them in any classroom. With a Wi-fi connection you are able to access many resources that can help you with your work in class and after school.

Here are some examples:

- Internet research to find out relevant information about what you are learning in class. This includes access to online encyclopedias, dictionaries and translation features
- Video tutorials on thousands of subjects on sites such as YouTube
- Note-taking on a word processor allows you to save, print and send out your work.
- File Folders allow you to organize your documents by subject
- Create Slideshows, Movies and other multimedia presentations—connect to a SMART board or projector to share content with classmates

PC and Mac Laptops

Tablets

Apple iPad

- Many free educational apps through the Apple Store
- Built in GPS to allow for tracking lost devices
- iCloud service allows for backup and synchronization of multiple Apple products
- Electronic Reader – download books and read them on the Ipad—highlight and make notes on the text and look up words in the dictionary or thesaurus
- Apps downloaded on the iPad can be replicated on another Apple device using the same Apple ID.
- Connection with an Apple TV device allows for displaying in a group setting.

Android and other Tablets

- Lightweight and portable
- Allow for note-taking and basic document storage
- Google Drive App allows to access any document or slideshow and share across multiple platforms.
- Camera—allows for taking pictures/videos to share or create multimedia presentations

Smart Phones

Iphone/HTC/Android/Blackberry

- Allows for easy access to internet browser
- Many social networking applications: Twitter, Facebook, BBM, What's App which allow for better communication across many platforms
- Mobile Gaming—online and live games
- Camera—easy to use for taking pictures/videos which can later be used for multi-media projects
- Some devices have scanner apps which allow to scan documents/pictures for printing and sharing
- Music players and applications which allow for sharing sounds
